Approved For Release 2003/08/25 : CIA-RDP61S00137A000100140107-7

25X1

Chrono

9 July 1956

ATTN :

Vital Materials Program.

25X1 1. This Division has just completed a search to determine which should be included in the Vital Materials Repository.

25X1 2. It has been determined by the branches that the items listed in the current stage of the program supplemented by the collateral selections of ORR are adequate.

3. A list of a few specific items is attached which should be added to the VMR. Some doubt presently exists as to the status of formal reports prior to publication. This Division is submitting certain items which will eventually be included in the VMR because of their status as finished intelligence. However, formal publication will not be completed until early in the Fall of 1956. Because these items might be of value in the 25X1A2G to be held later in July, they are submitted.
